

Package ‘jab.adverse.reactions’

July 22, 2025

Title Possible Adverse Events/Reactions from the
Vaccinations/Experimental Gene Therapies

Version 1.0.3

Depends R (>= 3.5.0)

Suggests tm, stringi, bracer, mgsub, qdapRegex, stringr, data.table,
xmlconvert, jsonlite, anytime, cffr, rbibutils, install.load

Author Irucka Embry [aut, cre]

Maintainer Irucka Embry <iembry@ecoccs.com>

Description Provides data about the possible adverse events/reactions
resulting from being injected with a vaccine/experimental gene therapy.
Currently, this data set only includes information from six reference
sources. Refer to the CITATION.cff file for the complete citations of
the reference sources. For information about vaccination\$/immunization\$
hazards, visit <<https://www.questionuniverse.com/rethink.html#vaccine>>,

jab_adverse_reactions	<i>Vaccine/Experimental Events/Reactions</i>	<i>Gene</i>	<i>Therapy</i>	<i>Possible</i>	<i>Adverse</i>
-----------------------	--	-------------	----------------	-----------------	----------------

Description

A table containing the possible adverse events/reactions due to being injected with a vaccine/experimental gene therapy shot.

Usage

```
jab_adverse_reactions
```

Format

A data.table data frame with 1324 rows and 6 variables:

Possible Vaccine Adverse Events Sorted, respective to the source, listing of possible adverse events/reactions resulting from the injection of a vaccine/experimental gene therapy jab

Source Title The title of the reference source

Source Author The author of the reference source

Source Date The date of the reference source

Source Additional Information Any other useful information from the citation of the reference source other than the URL

Source URL The URL of the reference source
